PROMOTION OF SMART, FRESH TOILETS (2018)

In a bid to increase household and institutional sanitation in east and central Uganda. Alliance Water Solutions through Community Sanitation Promoters (CSP), Parish Sanitation Promoters (PSP) and SFT masions have been promoting Smart, Fresh Toilets in both urban and rural areas throughout 2018. The current economic status and newness of the product has limited its consumption. However, despite the challenges, high success has been registerd to both household and institutions.

Smart, Fresh Toilets comes into Sato pans, Sato Flex pans and Sato stool as demostrated on 19th November 2018 in Buwenge town council during world Toliet day Celebration, which was organised by Sanitation for Health Activity (S4H), a USAID funded project.

As the organization focus on Sustainable WaSH Solutions through social marketing in 2019 emphasis shall be on:

1. Promotion of Improved Sanitation
   a. Emptying of pits latrines and septic tanks
   b. Construction of water borne Toilets at both household level and public places
   c. Stench reduction through promotion of Smart, Fresh Toilets

2. Increasing access to safe and clean water
   a. Construction of min-customized piped water systems
   b. Revamping of non-functional piped water systems
   c. Management of water systems for longer term sustainability

3. Health education
   a. School WASH
   b. Community Sanitation awareness campaigns
   c. Sanitation for Religious institutions

May lives be transformed through promoting Sustainable WaSH Solutions in 2019
