

DIVINE WISDOM JUNIOR SCHOOL KAMULI DISTRICT

Alliance Water Solutions is promoting improved sanitation and safe water in eastern and central Uganda through:

- ✚ Construction of emptyable toilets in markets, Islands and landing sites
- ✚ Fecal sludge management in institutions and peril-urban settlements
- ✚ Smart Fresh Toilet social marketing
- ✚ Domestic waste management
- ✚ Operation and maintenance of piped water systems
- ✚ Healthy education in schools and communities

Institutions and peril-urban settlements that are not connected to sewage systems are slowly adapting to lined pits that are emptyable and reusable. Lined toilets/latrines are constructed with bricks from underground and concrete/slab is laid at the bottom to avoid linkage of sewage into the ground and provide emptying options. However, few households/institutions have budgets to cater for emptying

It's against this background that Alliance Water Solutions in collaboration With Divine wisdom Junior School Kamuli was invited on 20th /August/2018 to provide emptying services to the school 6 stance lined pit as a way of promoting Smart Fresh Toilets that don't Smell, no flies and reusable without any worry of transmitting diseases especially to the girl child

Divine Wisdom Junior School Kamuli was begun by Pr. Balabwekubo David as its Director in 2015 in Kiwugu community Butansi sub-county, to support orphans and needy children who were struggling without help. The school has classes from Nursery to Primary four (4) with a current enrollment of 370 pupils of which 200 are girls with a teaching staff of 18 qualified personal and this is growing every year

Though achievement is seen by the erected classrooms, needy children, borehole that offer clean water and a lined pit. More support is needed to construct more toilets, classrooms and resources to meet the operation and management of the children who are increasing every year. I believe every cent matters to them.
