

ALLIANCE WATER SOLUTIONS PROMOTING WASH AT (S.A.L.V.E)

Support and Love Via Education (S.A.L.V.E) organization has done a tremendous work in Uganda especially in Jinja town which is soon becoming a city come 2020. S.A.L.V.E exists to give love and opportunities via education to children and the families of children living on the streets of Jinja, Uganda. They aim to see children leave the streets and return a stable family home and education to help them to become happy, self- sustaining and responsible adults.

The organization is located at Wakalenge Village, Namulesa parish in Mafubira sub-county; they have a spacious compound with well decent building that gives accommodation to children. Their staff are welcoming, interactive and give a sense of belonging and professionalism; at the peak of their land you can easily feel the sense of nature because of the beautiful scenery.

Though the access road towards their premises looks hard to use especially on rainy days, the place is so cool from town noise, has water, electricity, good structures and you can easily pick any mobile network which makes it a conducive place to stay and work. I wish to commend management for the great work they are doing in Uganda and also ask individuals and organizations to support this noble cause of (S.A.L.V.E) in resettling and rehabilitating of street children to have a happy home and a promising future.

With support from the office, Alliance Water Solutions was invited to promote improved sanitation through emptying of a two stance latrine, works took one day on 30th /September/2019 through a barrel based system and the latrine is ready for reuse again. Blessings
